

Quiz Generation Model Comparison

20-question UPSC-style quiz generated from the same real Docling-extracted source document, across 9 models via OpenRouter. Every question below is reproduced exactly as returned by each model - unedited.

Critical finding: Grok 4.3 has a systematic accuracy bug, not isolated errors. All 20 of its questions were individually checked against the source document. In exactly 10 of 20 (half), both statements are actually true according to the source, but Grok's own answer key selects "2 only" instead of "Both 1 and 2" - a consistent, repeatable bias, not scattered noise. Verified examples: Q2, Q4, Q11, Q13, Q18, Q19, Q20 (and others) all follow this identical pattern. This would make half of Grok 4.3's generated quizzes actively wrong for a student trusting the answer key.

One isolated instance of the same error type was found in GPT-5.4 Nano (Q19 - both statements about Article 4 are true per source, marked "2 only"), but only that single case in 20 questions - not a repeating pattern.

Every other model - DeepSeek V4 Flash (all 20 individually verified correct), Gemini 2.5 Flash-Lite, Mistral Small 4, GPT-5.4 Mini, Gemini 3.7 Flash, Claude Haiku 4.5, and Claude Sonnet 5 - checked out accurately across the questions verified, including correctly catching genuinely subtle traps (e.g. Sachchidananda Sinha vs. Rajendra Prasad as temporary Constituent Assembly president; M.N. Roy vs. Nehru raising the original demand; "Financial Emergency declared three times" vs. the source's explicit "never declared").

Note: Claude Haiku 4.5 generated 21 questions instead of the requested 20 - a minor quantity discrepancy, not a factual accuracy issue.

Gemini 2.5 Flash-Lite	14.0s	11115 / 5743	\$0.0034	\$0.0084	Spot-checked OK

Grok 4.3	25.6s	10199 / 3521	\$0.0038	\$0.0642	10/20 wrong (systematic)
GPT-5.4 Nano	26.2s	not isolated*	see cumulative	\$0.0046	1/20 wrong (isolated)
GPT-5.4 Mini	15.2s	not isolated*	see cumulative	\$0.0170	Spot-checked OK
Gemini 3.7 Flash	17.2s	11116 / 7374	\$0.0360	\$0.0496	Spot-checked OK
Claude Haiku 4.5	33.1s	12554 / 5117	\$0.0381	\$0.0593	21/21 verified
Claude Sonnet 5	51.3s	not isolated*	see cumulative	\$0.1299	Spot-checked OK

* GPT-5.4 Nano, GPT-5.4 Mini, and Claude Sonnet 5 required a fallback retry (require_parameters routing was rejected), which caused a script logging gap - their per-run token counts weren't captured in isolation. Their "OpenRouter cost (cumulative)" column is real, verified data from OpenRouter's own dashboard, but includes today's smaller verification runs alongside this 20-question run, not this run in isolation.

Grok 4.3 pricing note: the \$0.20/\$0.50 per-million-token rate used above was confirmed for "Grok 4 Fast" during earlier research; Grok 4.3 was substituted mid-project after Grok 4 Fast was deprecated, and this exact rate was not independently re-verified for 4.3 specifically. The cumulative OpenRouter cost column is the more reliable figure for this model.
